VULKAN Technologies Pvt. Ltd. sets up a new manufacturing facility in Pune, India

(March 2015) VULKAN Technologies Private Limited, a wholly owned subsidiary of Hackforth Holding GmbH & Co.KG, Germany has set up a new, state-of-the-art manufacturing facility at Pirangut near Pune, India.

The new plant was formally inaugurated on 17th March 2015 by Mr. Sebastian Hackforth, Managing Partner Hackforth Holding GmbH & Co. KG., in presence of Mr. Markus Wieneke, President Hackforth Holding GmbH & Co. KG, Dr. Andreas Boehme, President Vulkan Kupplungs- und Getriebebau Bernhard Hackforth GmbH & Co. KG and Mr. Rajesh Nath, Managing Director German Engineering Federation (VDMA). The new plant has come up on a 5 acre plot with constructed premises of about 80000 square feet, that houses Company's relocated Corporate Office, Production Facility of Division VULKAN Lokring with increased production capacity, ultramodern Machine Shop for the machining of Coupling parts & Castings and a Rubber Vulcanization Unit for the division VULKAN Couplings.

The plant is equipped with high-tech machineries, such as Oil & Chip Conveying System, Fume Condensation System and CNC centers in Machine Shop. In an endeavor to create a safe, healthy & clean working environment, various utilities have been installed as for example a fire detection & alarm system, a centralized air conditioning and ergonomically designed workplaces. Speaking on the occasion Mr. Sebastian Hackforth congratulated the Indian team for this big milestone and expressed his confidence about the future success of VULKAN in India. He also acknowledged the support of all the business associates for the growth of the Company.
