

A new milestone in our story.

Our competences grow.

**VULKAN Hybrid Architect.**

**VULKAN**

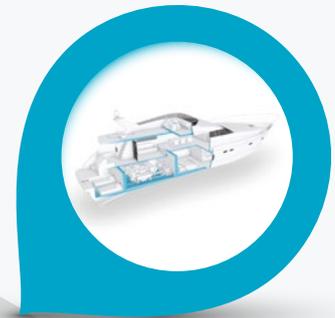

## More than just flexible

Born to provide reliable couplings for safe sailing.

## Drivetrain experts

Couplings expertise was not enough. Resilient and anti-shock mounts entered the scene.

## Vibroacoustic experts

Customers need support with vibrations and noise issues. We are in it from the beginning, analyzing customers' requests and the project with complex models and testing the selected solution at the end.

## VULKAN Hybrid Architect

Even the naval sector is taking steps towards green technologies that respect our planet. We want to do our part: we study customized sustainable solutions for your best comfort on board.

Our story.

# The next step towards green technology in the naval sector.

We provide customized green propulsion solutions.

Design /  
Consulting services

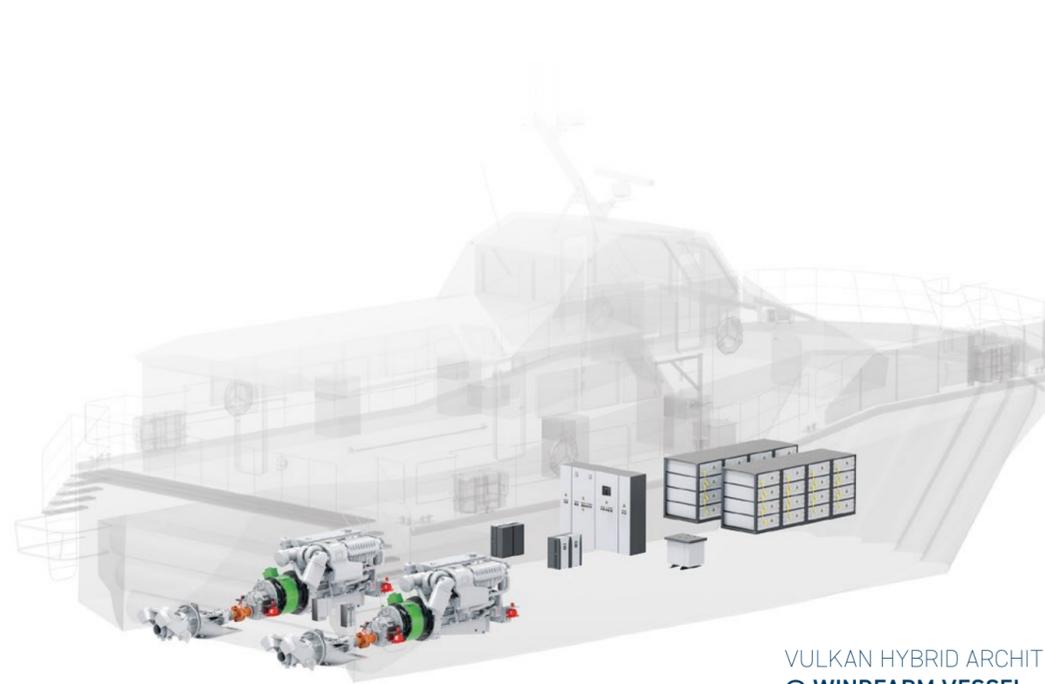

Deliver mechanical  
components  
(couplings + mounts + chocks)

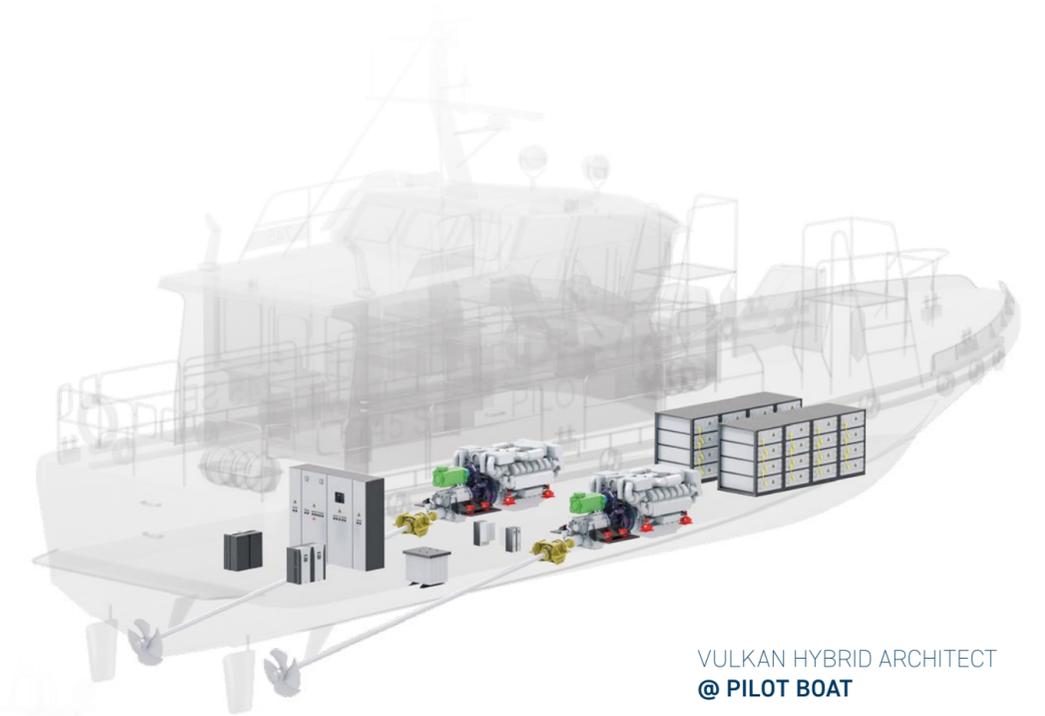

Deliver hybrid components  
(mechanical + electrical +  
electronics + battery)

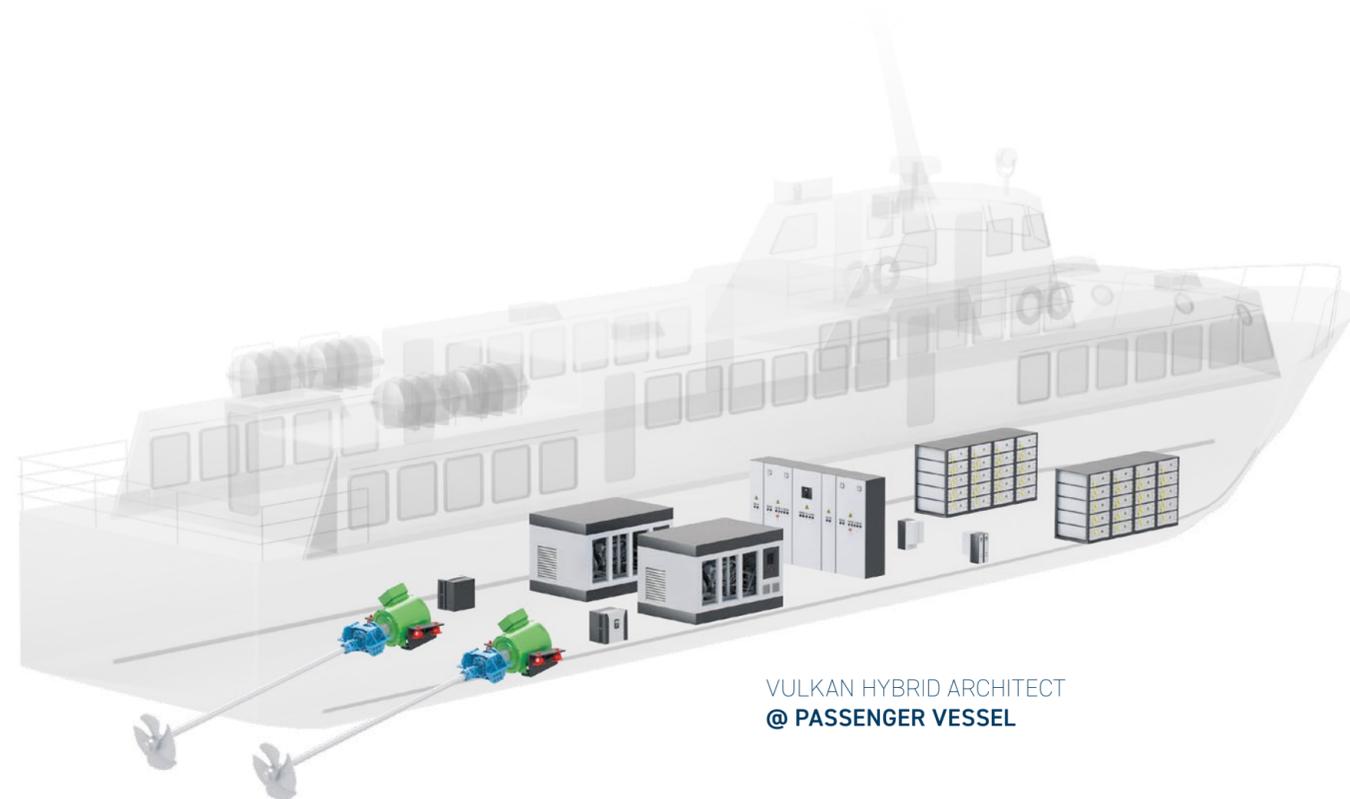

Design, delivery of the  
system with commissioning
