

VULKAN

Only music to your ears.

*Your partner against
noise and vibrations.*

***We prefer the
sound of the sea.
And you?***

***We go to the
heart of the
noise:***

**We design, build, take care
of the best vibro-acoustic
solution for your comfort.**

Alignment and Inspection

We carry out the commissioning and alignment of couplings and resilient mounts. Bad alignment is indeed one of the main reasons of #noise and #vibrations.

Retrofit and Conversion

We design and arrange your driveline upgrade to:

- ⌚ Improve the performance (noise and vibrations) of the shaft line
- ⌚ Increase the drivetrain life
- ⌚ Improve efficiency/sailing greener

Troubleshooting

Can't you stand noise and vibrations anymore? Let us work to solve your issue!

- ⌚ We **measure** vibrations and noise
- ⌚ We **analyze** the results
- ⌚ We **find out** sources and causes
- ⌚ We **study** the solution
- ⌚ We **build** and **arrange** it on board

VULKAN service / spare parts centers

We have trained an experienced professional network, able to advise and select the solution for your issue.

They can assist, supply and arrange services on board, relying on **VULKAN** service team for any technical in-depth study.

Check-out our VULKAN Italia website to find the closest one!

Our new services

Maintenance on our PROPFLEX T is even easier!

Our new ultrasonic tools measures temperature and vibrations of the thrust-bearings.

The benefit?

Easy and quick maintenance, done directly on board.

We are able to check and correct the whole shaft-line alignment now!

The benefit?

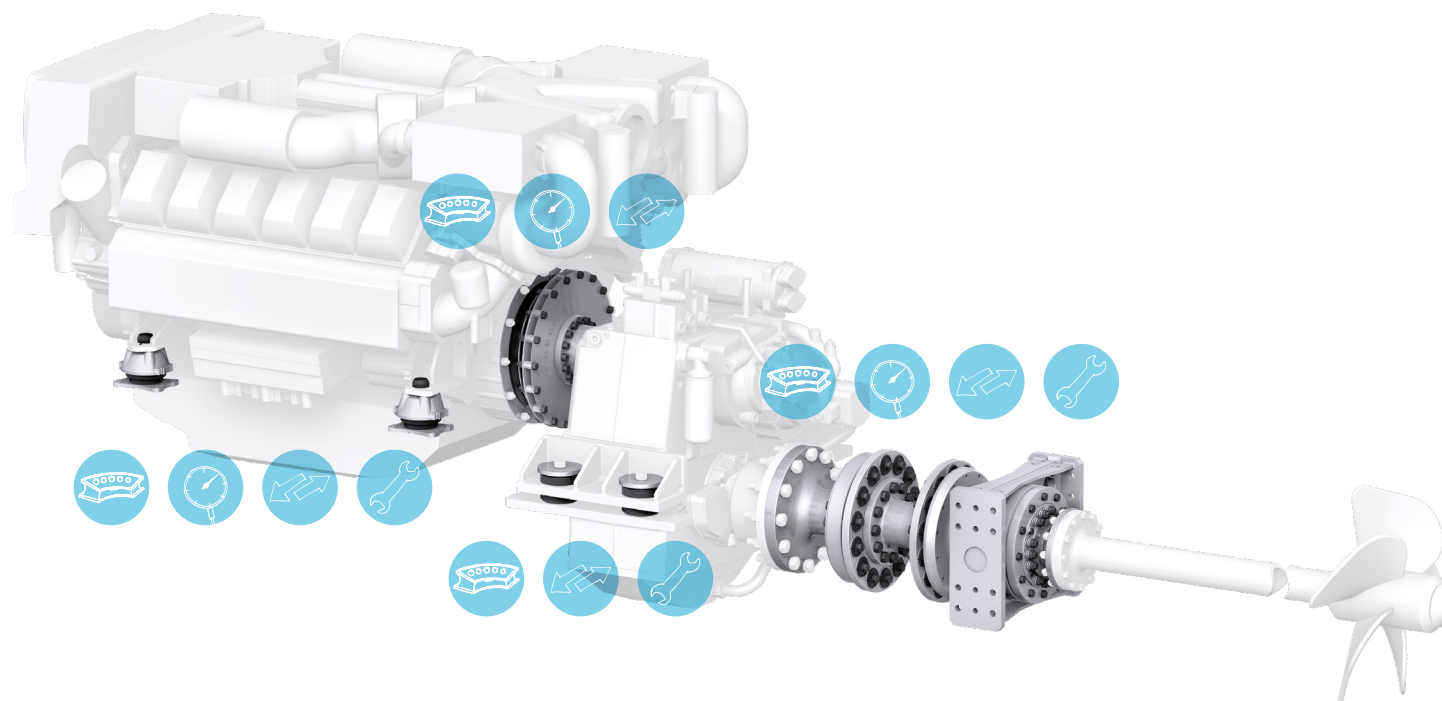

A single interface, expert and competent – all-in-one.

Sailing greener

This is the goal of our new VULKAN Hybrid Architect project.

The benefit?

Tailor made, greener plug & sail solutions.
